

Sparrow Cloud

Simplify Application Security with Sparrow Cloud!

Sparrow Cloud provides application security testing as a cloud-based SaaS service. With Sparrow Cloud, users can perform static and dynamic analysis to identify and manage security vulnerabilities from source code and web applications and also can identify open-source license information and security vulnerabilities in the software and binary files.

Static Analysis

Sparrow Cloud uses checkers that support major global compliance guides to check security vulnerabilities and quality issues in source code developed with Java, JSP, JavaScript, PHP, C#, ASP(.NET), Objective C, Python, HTML, SQL, XML.

Dynamic Analysis

Sparrow Cloud automatically crawls subdirectories information from a web application, and detects security vulnerabilities from crawled URLs.

Open-source management

Sparrow Cloud performs scans of software to identify open-source license information and security vulnerability and generate detailed reports or SBOM with component information in SPDX, CycloneDX, or SWID tag formats.

Manageability

With Sparrow Cloud, multiple users can share, manage, and report the results of application security testing on the basis of an application project.

Features

Supported Browsers

- Chrome 55 or later
- Edge 97.0.1072.62 or later
- Safari 14.0.3 or later
- Firefox 93.0 or later
- Internet Explorer 11 or later

Supported Compliance Guides

- CERT-Java
- CWE
- Oracle Java Code Conventions
- OWASP
- PCI DSS

About Us

Sparrow is an application security and quality testing solution provider that offers the application security ecosystem that includes Sparrow SAST/SAQT, an intelligent static analysis solution, Sparrow DAST, a powerful dynamic analysis solution, Sparrow RASP, a web application self-protection solution, Sparrow SCA, an open-source management solution, and Sparrow IHUB, a DevSecOps management solution. Sparrow solutions are available as on-premises and as a cloud SaaS.

Differences between On-Premise and Cloud

Compare Sparrow SAST/SAQT and Sparrow Cloud

	Sparrow SAST/SAQT	Sparrow Cloud-SAST
Static Application Security Testing	O	O
Static Application Quality Testing	O	O
Dashboard	O	O
Correction Guide (Active Suggestion)	O	X
Customizable Report	O	X
International Compliance Reference	O	O
Non-Complied Language Analysis	O	O
IDE Integration	O	X
C/C++ Analysis	O	X
CLI / Batch Analysis	O	X

Compare Sparrow DAST and Sparrow Cloud

	Sparrow DAST	Sparrow Cloud-DAST
Vulnerability Check with HTML5 / Ajax	O	O
Dashboard	O	O
Event Clipboard	O	O
IAST Module Testing (Truescan)	O	X
Customizable Report	O	X
International Compliance Reference	O	O
ReCheck	O	X
User Role & Permission	O	X

Compare Sparrow SCA and Sparrow Cloud

	Sparrow SCA	Sparrow Cloud-SCA*
Open-source license identification	O	O
Security vulnerability information	O	O
Source code analysis	O	O
Binary analysis	O	O
SBOM support	O	O
User Role & Permission	O	X
Snippet Analysis	O	X
